There are many endless runners' games in the app market but only few of them make a long-lasting impression. And it is safe to say that Loop Taxi is one of them. The game is all about picking up passengers and dropping them off at the next destination. The more passengers you pick the more gold you earn. The gold can be further used into buying cars and unlocking different maps. There are three different environments you unlock including city, upstate and military. And what makes Loop Taxi stand out of crowd, is its minimalistic graphics and easy controls which makes the gameplay look easier and smooth. In the game, you have to take passengers from one point to another and with pick and drop you will get certain amount of gold. But watch out, there are many intersections and traffic is always on a move. So have pay attention to the environment and traffic rules, and your one mistake could crash the taxi into some other cars. And as you progress further, you will come across many difficult situations like for example, you are waiting for traffic to pass but suddenly a tow truck will tow your car away and you have to start all over again. The controls are dead simple—just touch the screen to move the car from one point to another. Simple it may sound, but it takes some time to get used of controls and right timing to move the taxi and once you are familiar with it, you will end up playing it for hours and hours. There are many different cars to choose from including, taxi, sport, jeep, truck and many more. But you have to keep your patience as it takes a lot of time to earn those gold coins. With its sheer simplicity and minimalistic design, Loop Taxi is a worth your time.
