

Review : Ultimate Ears MEGABOOM Speaker: Blasts freakishly amazing 360-degree sound

Created On : 11-12-2017 **Created By :** My Mobile

Logitech's sub-brand Ultimate Ears has expanded its line-up of multi award-winning mobile speakers with MEGABOOM in India. The new product is the next-generation portable wireless speaker that delivers more power, more sound, more bass and more mayhem than the users have ever experienced before in a portable speaker. Ultimate Ears MEGABOOM lets the users bring the party anywhere and everywhere they go - from dusty music festival grounds and summer pool bashes to tailgates and every spurof- the-moment party in between, with sound that can only be defined as epic.

Building on the unprecedented success of Ultimate Ears BOOM, the next generation UE MEGABOOM blasts freakishly amazing 360-degree sound with deep, heart-pounding bass. It has a waterproof (IPX7 certified) grab-and-go shape that is shockingly light.

Users can take advantage of its long battery life and extended wireless range to start a party wherever, whenever they want to. Moreover, the speaker also comes with the option of downloading the free UE MEGABOOM app for iOS or Android to unlock an expanding set of cool features, such as a musical alarm, fully customizable sound and remote On/ Off. And now, for the first time ever, updates can be made to the speakers over the air.
